PaceTrack will use Tracks of Time, storing Time Logs for each Track. Track Examples – 'Work', 'Family', 'Leisure', 'Sports'.

Track Data –

- Name (String)
- Time Log (array of time values)
- Active Time (time value)

Time Value –

- Start Time
- Stop Time
- State Activity State (Fresh, Running, Complete)
- Notes
- Tags
- Attachments (Files, Images, Videos, Sounds, Note Pages)
- Suppl/TBD

The data will be segmented into blocks to enable server retrieval. At this time their will only be one block, 'all' however.
